Programme Specification for
MSc Midwifery Studies

1. Programme title                  MSc Midwifery Studies
2. Awarding institution            Middlesex University
3. Teaching institution            Middlesex University
4. Details of accreditation by professional/statutory/ regulatory body N/A
5. Final qualification             MSc Midwifery Studies
6. Year of validation
   Year of amendment
7. Language of study               English
8. Mode of study                   Part-time and Full-time

9. Criteria for admission to the programme
Students admitted to this programme must have:

- A Honours degree of 2:2 or above in nursing or a related subject
- UK nursing registration and be practising as a nurse
- Exceptionally, students who do not have a degree but who have successfully completed level 7 CPD modules or who can provide evidence of their ability to pursue successfully the PG Diploma or MSc may be considered.

10. Aims of the programme
The programme aims to:
1. Promote an informed, critical and ethical attitude towards post graduate and professional practice
2. Enable the student to plan an individualised pathway of post graduate study designed to meet previously identified midwifery related professional and service development objectives.
3. Demonstrate mastery in midwifery related skills and knowledge in order to contribute to enhanced professional nursing practice and service development
4. Facilitate the acquisition, critical understanding and utilisation of advanced research and inquiry skills and knowledge in order to conduct midwifery related research
11. Programme outcomes - the programme offers opportunities for students to achieve and demonstrate the following learning outcomes.

<table>
<thead>
<tr>
<th><strong>A. Knowledge and understanding</strong></th>
<th><strong>Teaching and learning methods</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>On completion of this programme, the successful student will have knowledge and understanding of:</td>
<td>Students gain knowledge and understanding through the use of a variety of teaching and learning strategies, informed by the University and School Teaching and Learning Strategies and which vary according to the type and focus of each module but which may include:</td>
</tr>
<tr>
<td>1. Specific professional, policy and/or clinical practice issues relevant to their area of healthcare practice.</td>
<td>- lectures, seminars and workshops, small group work and feedback, case studies, problem based scenarios and role-play, use of video, use of debates, practice based learning, use of e-learning, one-one tutorials to develop the research proposal and ideas for writing the research dissertation.</td>
</tr>
<tr>
<td>2. The critical evaluation of midwifery research</td>
<td></td>
</tr>
<tr>
<td>3. The critical analysis and evaluation of midwifery practice in light of evidence based findings</td>
<td></td>
</tr>
<tr>
<td>4. Advanced understanding of research methodologies</td>
<td></td>
</tr>
<tr>
<td>5. The advanced skills, knowledge and justification needed to undertake a large scale midwifery related research or work based learning project</td>
<td></td>
</tr>
<tr>
<td>6. How to make evidence based recommendations, in the context of the complex and multi-faceted factors affecting nursing care, for future midwifery research or service development</td>
<td></td>
</tr>
</tbody>
</table>

<tbody>
<tr>
<td>On completion of this programme the successful student will be able to:</td>
<td>Students learn cognitive skills through the use of a variety of teaching and learning strategies, informed by the University and School Teaching and Learning Strategies and which vary</td>
</tr>
<tr>
<td>1. Apply skills of critical thinking, evaluation and/or analysis to policy, practice and/or professional issues and dilemmas relevant to</td>
<td></td>
</tr>
</tbody>
</table>

**Assessment**

Students' knowledge and understanding is assessed by the use of a variety of methods, which are informed by the University and School Strategies and which vary according to the type and focus of each module.

- **Formative assessment** may include: written clinical case studies; case presentations, action plan presentations, on-line-quizzes and reflective discussions to help prepare students for the summative assessment.
- **Summative assessment** may include: case studies, service reviews, reports, critical reflection on practice and portfolios.

For the MSc, the student carries out a research or work based project and communicates their findings in the form of a dissertation or project.
their area of healthcare practice.

2. Independently evaluate own and others approaches to midwifery care and to service delivery and justify improvements in practice.

3. Demonstrate autonomy in the management of their own learning and is able to make use of other professionals, working effectively across complex health and social care teams according to the type and focus of each module but which may include: seminar preparation and presentation, use of web-based materials

For the MSc, this will include preparation for dissertation/project supervision and the production of the dissertation/ project.

### Assessment
Students’ cognitive skills are assessed by the use of a variety of methods, which are informed by the University and School Assessment Strategies and which vary according to the type and focus of the module but which may include:

**Formative assessment** may include: written clinical case studies; case presentations, action plan presentations, on-line-quizzes and reflective discussions to help prepare students for the summative assessment.

**Summative assessment** may include: case studies, service reviews, reports, critical reflection on practice and portfolios.
For the MSc, the student carries out a research or work based project and communicates their findings in the form of a dissertation or project.
