12. Programme structure (levels, modules, credits and progression requirements)

12. 1 Overall structure of the programme

The programme is studied over two years full time in an accelerated pattern. Each year students study 120 credits within the October-April semesters and then 60 credits during the summer (May-August).

The programme is divided into study units called modules and modules are either 15 or 30 credits. The academic provision of the University is based on credit accumulation. Students will accumulate credit points by passing modules in order to gain the award of the University. To gain a BA (Hons) degree title a student must gain 360 credit points of which 120 must be at level six.

In the first year (October-April) students study five compulsory level 4 modules. These modules are designed to give a solid grounding in business and management and bring all students to a standard level of competence to pursue further study in the subject.

In the first year summer (May-August) students will study three compulsory level 5 modules. These modules are designed to enhance and broaden their understanding of the core aspects of business and management.

In the second year (October-April) students will study a combination of level 5 and level 6 modules. Students will study two compulsory modules and also choose four optional modules. These are designed to advance skills and knowledge appropriate to graduate level in topics fundamental to managerial decision making.

In the second year summer (May-August) students will study three compulsory level 6 modules to complete their studies.
