

**Programme Specification and Curriculum
Map for BSc. (Hons) Sport & Exercise
Science (Physical Education and Coaching)**

1. Programme title	BSc. (Hons) Sport & Exercise Science (Physical Education and Coaching) BSc. (Hons) Sport & Exercise Science (Physical Education and Coaching) with Foundation Year
2. Awarding institution	Middlesex University
3. Teaching institution	Middlesex University
4. Details of accreditation by professional/statutory/regulatory body	-
5. Final qualification	BSc. (Hons) Sport & Exercise Science (Physical Education and Coaching)
6. Year of validation Year of amendment	2018-19
7. Language of study	English
8. Mode of study	Full Time / Part Time

9. Criteria for admission to the programme

Criteria for admission to the programme BSc. (Hons) Sport & Exercise Science (Physical Education and Coaching)

Evidence that they have capacity to work at level 3 for example:

- 5 GCSEs (Grade C or above) or 5 GCEs (Grade C or above) including:
 - English Language or Literature and Mathematics and Science
- PLUS, the following:
 - 48 UCAS tariff points with 32 points in a Science subject (equivalent to 2 A-level D's)

Evidence that they have capacity to work at level 4+ for example:

- 5 GCSEs (Grade C or above) or 5 GCEs (Grade C or above) including:
 - English Language or Literature and Mathematics and Science
- PLUS, one of the following:
 - Three A-Levels with a minimum of 112 UCAS Tariff points with least one A level in a science discipline or physical education.
 - A BTEC National Diploma or Certificate in an appropriate area (e.g. Applied Science/Sport) normally with a minimum of one distinction and two merits OR
 - Applicants who have successfully completed a relevant Diploma in Access to Higher Education (Science) with a minimum of a merit OR
 - Applicants who have successfully completed an appropriate (e.g. Applied Science/Sport) Advanced GNVQ with at least 3 level III passes at merit standard.
 - Mature Students will be interviewed by the team to discuss suitability for study at level 4. Applicants who have successfully passed a HE Foundation Science/Sport programme.
 - Overseas applicants with an appropriate qualification and an IELTS score of 6.0 and over.

10. Aims of the programme

The programme aims to:

- A. Provide a multi-disciplinary understanding of sport and exercise science, and physical education practice.
- B. Provide a balance of scientific, technical, on which to base professional competence in relation to sport and exercise science.
- C. Enable students to identify, implement and evaluate appropriate control strategies to promote effective coaching sessions in PE & Coaching.
- D. Integrate leadership skills in professional practice and establish the basis for subsequent career or research success (Lifelong learning).
- E. Enable students to positively and flexibly respond to a changing sport & exercise science environment and facilitate the development of problem solving skills.
- F. Enable to students to evaluate and appraise new information, review evidence and critically analyse conflicting theories and assimilate best professional practice in PE & Coaching.

11. Programme outcomes

A. Knowledge and understanding

On completion of this programme the successful student will have a knowledge and understanding of:

1. The principles of sport and exercise science.
2. Physical Education and Coaching science and its inter-relationship with other fields of study.
3. Applied Sport & Exercise Science topics with a particular emphasis in specialist areas.
4. Significance of Physical Education & coaching and its relationship to professional code of practice.
5. An evidence-based approach to deal with the complexities of sport and exercise science.
6. Career opportunities specific to their chosen programme.
7. Applying autonomous and reflective approaches to lifelong learning.

Teaching/learning methods

Students learn knowledge and understanding through attendance in lectures, seminars, tutorials, workshops, problem-solving sessions, laboratory teaching, demonstration classes, placement and fieldwork. In these sessions students will get a variety of directed and self-directed learning activities e.g. Group projects, case study analysis, laboratory-based learning, and portfolio development and work-based activity.

Students acquire graduate skills through reading, group work exercises, structured and directed learning, reflection and development of portfolio material, formative assessment and on placement.

Assessment methods

(a) Formative assessment

Formative assessment will be used to identify learning gaps throughout the module to close academic gaps and promote student success. This will include students assessing themselves, peers and academics through their writing, quizzes, practicals, presentations and oral discussion. All formative assessment will occur during planned sessions and varied to depending on the content learning objectives of the lesson.

	<p>(b) Summative assessment Summative assessment will be used to evaluate student learning, skill acquisition and academic achievement throughout the module. This will include examinations, coursework, practical vivas, laboratory reports, presentations, professional portfolios and in-course tests.</p>
<p>B. Skills On completion of this programme the successful student will be able to:</p> <ol style="list-style-type: none"> 1. Identifies, selects and uses analytic and evaluative skills that address issues influencing physical education and coaching practice. 2. Prioritise a range of options and select appropriate communication formats to convey solutions. 3. Apply sports and exercise science knowledge in unfamiliar contexts, synthesising ideas or information to generate novel solutions. 4. Demonstrate confidence and flexibility in identifying and defining complex problems within sport and exercise science. 5. Critically evaluate the results of an academic investigation and be able to extract data using a range of techniques appropriate to their chosen fields. 6. Select and execute appropriate laboratory or field tests and supports or is proactive in leadership requiring a level of autonomy. 7. Review and competently carry out risk assessments or appropriate emergency care in accordance with legislation and professional codes of conduct. 8. Work effectively within a team and demonstrate organisational skills laboratory and field-based settings. 9. Seek and apply new techniques and processes to own performance and identify how these might be evaluated. 	<p>Teaching/learning methods Where possible, students learn cognitive and practical skills through lectures, discussions, formative assessment, peer-review of seminar presentations, debates and directed reading. Virtual laboratory simulations will also be used to develop knowledge of practical skills.</p> <p>Students knowledge of practical skills are assessed by attending laboratory classes, formative assessment, skills sessions and work experience.</p> <p>Assessment Method</p> <p>(a) Formative assessment scheme Formative assessment will be used to identify learning gaps throughout the module to close academic gaps and promote student success. This will include students assessing themselves, peers and academics through their writing, quizzes, practical's, presentations and oral discussion. All formative assessment will occur during planned sessions and varied to depending on the content learning objectives of the lesson.</p> <p>(b) Summative assessment Students cognitive and practical skills are assessed by practical vivas, lab reports, presentations, professional portfolios and in-course tests.</p>

12. Programme structure (levels, modules, credits and progression requirements)

12.1 Overall structure of the programme

An undergraduate BSc honours degree is comprised of 360 credits of learning. In each year you will take 120 credits (P/T 60 credits of learning) of learning and this will enable you to complete your award as a full-time student in 3 years. Modules are delivered as either 30 or 15 credits. 30 credit modules are studied over the whole academic year of 24 weeks of learning followed by an assessment period. The 15 credit modules are normally studied for 12 weeks in term 1, or 12 weeks in term 2.

Part-time study at each level is permitted, and the selection of modules will be chosen by the programme leader in consultation with the student at the start of the academic year, totalling 60 credits per year.

Foundation Year			
SMART SAT0100 (30 Credits)	Foundation Mathematics MSO0200 (30 Credits)	Foundation Project SAT0300 (30 Credits)	Introductory Sport Science SES0100 (30 Credits)

Year 1				
Professional Skills and Work Based Practice SES1701 (30 Credits)	Movement Analysis SES1704 (15 Credits)	Fundamentals of Sport & Exercise Science SES1702 (30 Credits)	Fundamentals of Physical Education & Coaching SES1705 (15 Credits)	Fundamentals of Training Principles in Sport & Exercise SES1703 (30 Credits)

Year 2				
Research Methods SES2701 (30 Credits)	Applied Sport & Exercise Science SES2704 (30 Credits)	Applied Performance Analysis SES2703 (15 Credits)	Applied Sport & Exercise Nutrition SES2702 (15 Credits)	Applied Physical Education & Coaching SES2705 (30 Credits)

Year 3			
Dissertation SES3701 (30 Credits)	Advanced Sport & Exercise Science SES3702 (30 Credits)	Advanced Physical Education & Coaching SES3704 (30 Credits)	Work Based Practice SES3703 (30 Credits)

12.2 Levels and modules		
Level 3 – (Foundation Year) 120 Credits		
COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take all of the following: SAT0100 SMART MSO0200 Foundation Mathematics SAT0300 Foundation Project SES0100 Applied Physical Education & Coaching	There are no optional modules.	All level 3 modules must be passed to progress. Modules can be compensated in accordance to University regulations.
Level 4 (1) 120 Credits		
COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take all of the following: SES1701 Professional Skills and Work Based Practice SES1704 Movement Analysis SES1702 Fundamentals of Sport & Exercise Science SES1703 Fundamentals of Training Principles in Sport & Exercise SES1705 Fundamentals of Physical Education & Coaching	There are no optional modules.	All level 4 modules must be passed to progress. Modules can be compensated in accordance to University regulations.
Level 5 (2) 120 Credits		
COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take all of the following: SES2701 Research Methods SES2704 Applied Sport & Exercise Science SES2703 Applied Performance Analysis SES2702 Applied Sport & Exercise Nutrition SES2705 Applied Physical Education & Coaching	There are no optional modules.	All level 5 modules must be passed to progress. Modules can be compensated in accordance to University regulations.
Level 6 (3) 120 Credits		
COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take all of the following: SES3701 Dissertation SES3702 Advanced Sport & Exercise Science SES3704 Advanced Physical Education & Coaching SES3703 Work Based Practice	There are no optional modules.	All level 6 modules must be passed to graduate.

12.3 Non-compensatable modules (note statement in 12.2 regarding FHEQ levels)

Module level	Module code
--------------	-------------

All Level 6 modules are non-compensatable.

13. Curriculum map

See curriculum map attached.

14. Information about assessment regulations

The regulations applying to the programme are those common to the University. There are opportunities for re-assessment in failed components of work and specific details are given in the module handbooks. At levels 5 and 6, where a student has failed a piece of work, the mark for the resubmitted work is capped at 40%.

Students must adhere to module assessment deadlines. Where a student cannot meet the deadline for extenuating reasons (for example illness, accidents, bereavement, family problems), an extension can be formally requested. Failure to participate in assessment without good reason will result in a fail grade for the summative assessment.

Students that have an average attendance falling below 80% over a 5-week period will automatically be required to attend a meeting with their programme leader and achievement officer. This meeting will look to support students and ensure their suitability to continue with their studies.

Due to the health and safety requirements, all students with an attendance below 80% will not be able to complete practical/laboratory assessments and will receive a 20-grade for that assessment. To enable re-assessment at a later date, students must attend the module specific revision session(s) in selected programme weeks and obtain the consent of the module leader to sit the outstanding exam. In situations where the student has agreed extenuating circumstances from the university, the resultant grade will **not** be capped at 40%.

Due to the health and safety requirement of work experience, students with attendance below 80% will not be able to complete placement hours. To obtain the consent of the module leader to attend a placement, students must attend the specific revision session(s) in selected programme weeks. In situations whereby the student has agreed extenuating circumstances from the university, the resultant grade will **not** be capped at 40%.

All work submitted after the assessment deadline is a fail and will receive an academic grade-20. In situations of extenuating circumstances,

- Students are unable to upload work to the University system, evidence along with their work must be emailed to the module leader before the deadline passes.
- If there are extenuating circumstances caused through personal issues with the student, an extenuating circumstances form must be applied for via Unihub prior to the submission deadline.

Late practical assessment: all students must upload accompanying work at proposed module deadline prior to practical assessment. If the work is not uploaded by the deadline they will not be able to complete the practical assessment.

Late attendance to practical assessment: Students are required to arrive 15 minutes before practical time. If the student is absent when called to their assessment they will not be able to complete the assessment that day and will be recorded as a fail, receiving an academic grade 20.

If there is a genuine circumstance of why the student is late, an email needs to be sent with evidence to the module leader and the assessment can take place at the next available slot.

Group assessments: All students must upload accompanying work at proposed module deadline prior to practical assessment. If the work is not uploaded by the deadline they will not be able to complete the practical assessment. In the event that a student(s) does not arrive, the group is still expected to complete it as the whole group should know every component.

If the assessment requires students to support others as part of a group to be a body/participant and they do not turn up or organize this then they will be capped at 40% when their assessment takes place.

Practical: All students must be dressed in LSI branded kit, suitable to the activity.

15. Placement opportunities, requirements and support (if applicable)

There is a compulsory placement module in academic year 1 and 3, where students will be expected to seek short term up to 100hours of work experience in suitable sport and exercise science environments. This should be supervised by a suitable sport science practitioner (Coach, teacher, lecturer, Graduate etc.) and adhering to the QAA quality assurance processes (section B).

In academic years 1, the placement will be passed providing the student completes the required hours. In year 3, the placements will be assessed on the successful completion of 100 hours, utilising a portfolio design to measure various aspects of their learning.

16. Future careers (if applicable)

This degree is broad in scope, allowing students to study the full potential of sports and exercise sciences, and gain an expert knowledge and understanding of scientific methods from sports psychology to the study of the human form. Students completing this programme will graduate with the essential skills and knowledge to thrive in the sport and exercise industry and be well-prepared to enter a broad range of careers working with athletes to support their development or helping people at all levels of fitness to stay healthy.

This programme all students wishing to participate in a career of, Sport Science, Dietician, Fitness Instructor / Personal Trainer, GP Referral Exercise Consultant, Health Promotion Specialist, Lecturer in Higher Education, Performance Analyst, Physical Activity Development Manager, Sport and Exercise Psychologist, Sports Development Officer, Strength and Conditioning Coach, Teacher.

17. Particular support for learning (if applicable)

Learning resources at Hendon, sport and exercise science laboratories at Allianz Park, specialised external lecturers, learning resources for subject area and IT helpdesk.

18. JACS code (or other relevant coding system)	C600
19. Relevant QAA subject benchmark group(s)	Hospitality, Leisure, Sport and Tourism

20. Reference points

The following reference points were used in designing the Programme.

Internal documentation:

- Middlesex University (2015) Guide and Regulations. London. MU.
- Middlesex University (2013) Equality and diversity Policy. London. MU
- Middlesex University (2015). Curriculum Design.

External Documentation:

- Quality Assurance Agency (2014) The Framework for Higher Qualifications of UK Degree-Awarding bodies (Qualifications Framework), London, QAA
- Quality Assurance Agency (2016) QAA Subject Benchmarking Group: Hospitality, Leisure, Sport and Tourism.
- HEA (2010). Analysis of Academy Resources supporting the JISC Transforming Curriculum Design and Delivery Programmes Phase 1 &2.

21. Other information

The following course-related costs are included in the fees:

- A free electronic core textbook for every module,
- All printing and copying required for your study,
- Self-service laptops available for loan for a maximum of 24 hours,
- Audio-visual equipment available for loan, including digital stills cameras, digital video recorders, digital audio recorders.

The following course-related costs (partially funded by the London Sport Institute) are not included in the fees, and you are required to purchase these to complete the course. The costs are approximate and may change due to changes in pricing at the retailer: -

- First Aid training (~£40)
- London Sport Institute Sports Kit (~£80)
- Reps Level 2 and 3 (£~50 each)
- Up to one Level 1 NGB Qualification over the 3 years (~£100)
- Up to one course-related trip (~£100)
- One residential trip over the 3 years (~£200)

Further details on specific additional equipment which is not included in your fees can be requested from the Programme Leader.

Please note programme specifications provide a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve if s/he takes full advantage of the learning opportunities that are provided. More detailed information about the programme can be found in the rest of your programme handbook and the university regulations.

Appendix 2: Curriculum Map

Curriculum map for BSc (Hons) Sport and Exercise Science (Physical Education & Coaching)

This section shows the highest level at which programme outcomes are to be achieved by all graduates, and maps programme learning outcomes against the modules in which they are assessed.

Programme learning outcomes

Knowledge and understanding		Cognitive Skills	
A1	The principles of sport and exercise science.	B1	Identifies, selects and uses analytic and evaluative skills that address issues influencing physical education and coaching practice.
A2	Physical Education and Coaching science and its inter-relationship with other fields of study.	B2	Prioritise a range of options and select appropriate communication formats to convey solutions.
A3	Applied Sport & Exercise Science topics with a particular emphasis in specialist areas.	B3	Apply sports and exercise science knowledge in unfamiliar contexts, synthesising ideas or information to generate novel solutions.
A4	Significance of Physical Education & coaching and its relationship to professional code of practice.	B4	Demonstrate confidence and flexibility in identifying and defining complex problems within sport and exercise science.
A5	An evidence-based approach to deal with the complexities of sport and exercise science.	B5	Critically evaluate the results of an academic investigation and be able to extract data using a range of techniques appropriate to their chosen fields.
A6	Career opportunities specific to their chosen programme.	B6	Select and execute appropriate laboratory or field tests and supports or is proactive in leadership requiring a level of autonomy.
A7	Applying autonomous and reflective approaches to lifelong learning.	B7	Review and competently carry out risk assessments or appropriate emergency care in accordance with legislation and professional codes of conduct.
		B8	Work effectively within a team and demonstrate organisational skills laboratory and field-based settings.
		B9	Seek and apply new techniques and processes to own performance and identify how these might be evaluated.
