It’s important to recognize that a university education is an investment in your future, and graduates reap real personal development, financial and career rewards throughout their lifetime. University offers the opportunity to build your confidence, experience new things and acquire crucial skills such as time management, interpersonal and communication skills. As well as offering specific job skills, a degree demonstrates the ability and motivation to learn, and is the first step towards developing a career plan.

To help you make the most of your investment, we provide a comprehensive network of student support, employability and careers advice.

For more information

These services will guide you through a wide range of opportunities to prepare you for life after graduation.

The Employability Centre at Middlesex helped me with my CV and provided me with some useful tips on how to prepare for an interview. In the end, I managed to secure a placement at IBM Global Trade Union in Geneva.

What are Middlesex’s fees?

The fee for most of our undergraduate degree courses for UK students is £9,250 per year. It has always been, and will remain, our priority to ensure that your fees are invested wisely into a quality learning environment.

We expect that you will rightly demand the highest standards from your chosen university, and at Middlesex we are carrying out ambitious development programmes to ensure that your expectations are met.

We are committed to providing the highest possible teaching quality, and in addition to a significant investment in our excellent teaching staff, we have also spent more than £200 million on our campus and facilities. We believe you deserve state-of-the-art equipment and an environment that will allow you to excel – personally and academically.

Our student body is diverse, both in terms of background and talent, and we’re proud to help them. We believe that bright students should have the opportunity to study at Middlesex whatever their circumstances, and that cost should not compromise on quality.

Financial support

Tuition fee loans

UK or EU full-time or part-time students who have not studied in higher education before can apply for a loan to cover the cost of tuition fees. This is paid directly to the University so there are no upfront costs.

Maintenance loans

This loan helps you with your living costs. You must be either a full-time or part-time UK student. The loan is paid directly into your bank account at the start of term.

For both the tuition fee and maintenance loans you will repay your loan once you have graduated and are in employment, earning over £26,575 per year.

For further information on tuition fee and maintenance loans visit www.slc.co.uk.

Scholarships

We offer scholarships, which are funded by private donors. Find out more overleaf and at www.mdx.ac.uk/scholarships.

Part-time study

Most undergraduate courses can be studied part-time, to enable you to work while you study for your degree. Loans are available to part-time students for up to 75% of full-time study equivalent.

Working while studying

Often students on full-time courses can still make time for some paid employment. Some of our students work part-time for the University as Student Ambassadors or Student Learning Assistants.

Scholarships are very important for students as they show the immense support we receive while studying. This scholarship has not only given me more time to focus on my research, but it has helped me achieve my goals for the year.

Mark Barfod Hedman
BA International Business

Winning a scholarship has given me self-confidence and a greater belief in myself. The donors have kindly invested their resources in my education, and for that I am thankful.

Khawaja Khalid Aftab
BA Accounting and Finance

Tuition fee loans are available at the point of access and not repayable until graduation. You will be required to repay your tuition fee and maintenance loans once you have graduated and are earning over £26,575 per year.

Loans will be repaid at a rate of 9% of the amount of your income which exceeds £26,575. Repayments will be deducted automatically each month in the same way as national insurance and income tax.

If your annual income falls below £26,575 per year, for example during a career break or maternity leave, repayments will cease until earnings have risen to over £26,575 again. If a loan is not repaid after 30 years, the remainder will not need to be repaid.

For further updates on Student Loan Interests and Repayments, see www.gov.uk/repaying-your-student-loan.

For an idea of what the repayments on a loan might be, based on a projection of a future salary, there is a useful Student Finance Calculator tool on the Money Saving Expert website. See www.moneysavingexpert.com/students/student-finance-calculator.
