

BSc Psychology with Neuroscience

Programme Specification

1. Programme title	BSc Psychology with Neuroscience
2. Awarding institution	Middlesex University
3. Teaching institution	Middlesex University
4. Details of accreditation by professional/statutory/regulatory body	British Psychological Psychology
5. Final qualification	Bachelor of Science
6. Year of validation Year of amendment	2018-19
7. Language of study	English
8. Mode of study	FT, TKSU, PT

9. Criteria for admission to the programme

120 UCAS points or equivalent. Maths, English & Science GCSE at grade C or better. Overseas students should have IELTS = 6.0 (with 5.5 minimum in each component) or equivalent.

10. Aims of the programme

The programme aims to:

- Provide a sound knowledge of Psychology and Neuroscience appropriate to future professional work;
- Introduce the broad range of theoretical and methodological approaches to Psychology and Neuroscience;
- Encourage students to develop a critical approach to their studies, evaluating theory and evidence accordingly;
- Equip students to communicate effectively in written and numerical forms;
- Encourage independent and experiential learning, the development of oral communication skills, and the capacity for independent work;
- Maintain wide access to study for students with suitable qualifications or experience;

- Provide a grounding in all areas of Psychology such that students may progress onto postgraduate training and education in Psychology;
- Provide students with excellent graduate skills for employability.

11. Programme outcomes	
<p>A. Knowledge and understanding</p> <p>On completion of this programme the successful student will have knowledge and understanding of :</p> <p>A1 The main theoretical approaches to psychology;</p> <p>A2 An understanding of the fundamentals of psychological research design and analysis;</p> <p>A3 Of findings and debates in biological psychology;</p> <p>A4 Of findings and debates in developmental psychology;</p> <p>A5 Of findings and debates in cognitive psychology, including the areas of perception, learning, memory, language and thinking;</p> <p>A6 Of findings and debates in social psychology;</p> <p>A7 Of findings and debates in individual differences in psychology;</p> <p>A8 Detailed knowledge and understanding of Neuroscience and Neuropsychology.</p>	<p>Teaching/learning methods</p> <p>Students gain knowledge and understanding through attendance & participation in teaching sessions and independent research (with tutor support). Learning is supported with online self-study materials.</p> <p>Assessment methods</p> <p>Students' knowledge and understanding is assessed by examinations (Essay, short-answer), essays, article reviews, practical reports, workbooks, presentations and dissertation work.</p>
<p>B. Cognitive (thinking) skills</p> <p>On completion of this programme the successful student will be able to:</p> <p>B1 Apply multiple perspectives to areas within psychology and neuroscience;</p> <p>B2 Integrate perspectives in psychology, and neuroscience;</p> <p>B3 Identify & evaluate patterns of behaviour & psychological functioning;</p> <p>B4 Formulate & explore research questions.</p> <p>B5 Perform quantitative & qualitative data analyses</p> <p>B6 Use statistical software to analyse data</p>	<p>Teaching/learning methods</p> <p>Students learn skills through class discussion, guided independent study, lecturer feedback presenting their ideas in written & oral form & participation in practical classes.</p> <p>Assessment methods</p> <p>Students' skills are assessed by: examinations (Essay, short-answer), essays, workbooks, critical reviews, practical reports, dissertation work and video assessments.</p>

<p>B7 Design, implement, analyse and communicate independent and group project work;</p> <p>B8 Demonstrate effective written and oral communication enabling students to formulate and sustain a coherent argument;</p> <p>B9 Use literature search software to gather and evaluate academic work;</p> <p>B10 Use experimental software to design and run experiments</p> <p>B11 Use psychophysiological equipment to gather and interpret data</p>

12. Programme structure		
12. 1 Overall structure of the programme		
Year 1	Year 2	Final Year
PSY1020 (30 Credits) Mind & Behaviour in Context	PSY2004 (30 Credits) Research Methods & Ethics in Psychology	BMS3906 (30 Credits) Applied Clinical Neurophysiology
PSY1016 (30 Credits) Research Methods & Design in Psychology	PSY2006 (30 Credits) Brain, Body and Mind	PSY3052 (15 credits) Neuropsychology: The healthy brain and what can go wrong with it
PSY1018 (15 credits) Psychological Statistics	PSY2007 (30 Credits) Social, Personality and Developmental Psychology	PSY3xxx Options
PSY1019 (15 credits) Personal Coaching for Academic Success	BMS2955 (30 Credits) Neurophysiology	PSY3330 (30 Credits) Psychology Dissertation OR

BMS1464 (30 Credits)

**Foundation
Neuroscience**

N.B. TKSW students take
PSY3004 Psychology
Placement (120 Credits) in
Year 3.

PSY3XXX (45 Credits)

**Extended psychology
dissertation**

Final year Optional Modules

Students must take either:

PSY3330 Psychology Dissertation (30 Credits)

or

PSY3331 Extended Psychology Dissertation (45 Credits)

(NB registration on PSY3331 is by application – see module narrative)

Student must take:

PSY3052 Neuropsychology: The healthy brain and what can go wrong with it (15 credits)

BMS3906 Applied Clinical Neurophysiology (30 credits)

Students can choose to take:

PSY3024 Professional Practice (30 credits)

The remaining credits must be filled with the following options, a maximum of one module can be taken from each block:

Autumn term Modules

Block 1:

PSY3034 Advanced Qualitative Research Methods (15 credits)

PSY3041 Atypical Child Development (15 credits)

PSY3051 Applying health Psychology to behaviour change (15 credits)

PSY3054 Critical Forensic Psychology (15 credits)

Block 2:

PSY3037 Creative and Visual research methods (15 credits)

PSY3033 Infancy and childhood: psychoanalytic perspectives (15 credits)

PSY3047 New Directions in Cognitive Science (15 credits)

PSY3046 Social, Cultural & Community Mental Health (15 credits)

Block 3:

PSY3035 Creativity & Imagination (15 credits)

PSY3042 Psychology in Education (15 credits)

PSY3046 How to DO cognitive neuroscience (15 credits)

PSY3032 Contemporary Psychoanalytic Practice: Psychoanalysis for Therapists (15 credits)

Spring term Modules:

Block 4:

PSY3038 Psychology of Music (15 credits)

PSY3057 Primatology (15 credits)

PSY3053 Neuropsychology of language & communication (15 credits)

PSY3030 Death, Separation and Loss (15 credits)

PSY3048 Key Issues and Controversies in the Psychology of Elite Sport Performance (15 credits)

Block 5:

PSY3043 Coaching Psychology (15 credits)

PSY3045 Lifespan Stages: Adult stages of development (15 credits)

PSY3036 Fundamentals of cognition: Human memory (15 credits)

PSY3031 The Science Of Intimate Relationships (15 credits)

Block 6:
 PSY3039 Therapeutic Psychology (15 credits)
 PSY3044 Lifespan Issues: Impact of Life Experience (15 credits)
 PSY3055 Evolutionary Approaches to Behaviour (15 credits)
 PSY3049 The Psychology of Stress, Motivation and Work-Life Balance (15 credits)

12.2 Levels and modules

Level 4

COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take all of the following: PSY1020 PSY1016 PSY1018 PSY1019 BMS1464	N/A	All modules at HE5 are required to be passed (or compensated) for progression to HE6.

Level 5

COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take all of the following: PSY2004 PSY2006 PSY2007 BMS2955	N/A	All modules at HE5 are required to be passed (or compensated) for progression to HE6.

Level 6

COMPULSORY	OPTIONAL	PROGRESSION REQUIREMENTS
Students must take one of the following: PSY3330 PSY3331 Students must take PSY3052 BMS3906	PSY3024 Students must fill 120 credits from the possible final year options Students may take PSY3004 as part of a 4-year TKS W programme.	PSY3004>PSY3330 (TKSW)

12.3 Non-compensatable modules (note statement in 12.2 regarding FHEQ levels)

Module level	Module code
HE4	PSY1016 - Research Methods & Design in Psychology
HE4	PSY1018 – Psychological Statistics
HE5	PSY2004 - Research Methods & Ethics in Psychology
HE6	PSY3330 – Dissertation
HE6	PSY3331 – Extended Dissertation

13. Curriculum map

See attached.

14. Information about assessment regulations

Students are required to pass all modules in order to complete the programme.

15. Placement opportunities, requirements and support (if applicable)

Placement opportunities are available to study psychology in the work place. These can be achieved either through full-time year-long study in year three of a four year degree or on a part-time basis alongside other study units in the final year of study. Please visit the Placement Office for more details.

16. Future careers (if applicable)

Graduates achieving a Lower Second Classification (or better) and having passed their Psychology Dissertation (PSY3330) will be eligible to apply for BPS accredited Masters & Doctoral programmes leading to careers as a Psychologist. Graduates will also be able to progress to postgraduate training.

17. Particular support for learning (if applicable)

The Department of Psychology has extensive laboratory and workshop facilities.

- Two computer laboratories
- Group work laboratory
- Psychophysiology laboratory
- Suite of observation laboratories
- Virtual reality lab

- Nine testing cubicles

These facilities are maintained by two Psychology technicians.

18. JACS code (or other relevant coding system)

C832

19. Relevant QAA subject benchmark group(s)

Psychology

20. Reference points

The following reference points were used in designing the Programme:

- QAA Subject Benchmark Statement for Psychology (October, 2010)
- British Psychological Society (2012). *Accreditation through partnership: Guidance for undergraduate & conversion psychology programmes*. Leicester: BPS.
- BPS, HEA Psychology Network & AHPD (2011). *The Future of Undergraduate Psychology in the United Kingdom*. York: HEA Psychology Network.
- Middlesex University Learning and Teaching Policies and Strategy
- Student Feedback
- External Examiner Feedback

21. Other information

BPS accreditation requirements:

- broad coverage of the qualifying syllabus
- staff-student ratio lower than 20:1

Please note programme specifications provide a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve if s/he takes full advantage of the learning opportunities that are provided. More detailed information about the programme can be found in the rest of your programme handbook and the university regulations.

Curriculum Map

Curriculum map for BSc Psychology with Neuroscience

This section shows the highest level at which programme outcomes are to be achieved by all graduates, and maps programme learning outcomes against the modules in which they are assessed.

Programme learning outcomes

Knowledge and understanding	
A1	The main theoretical approaches to Psychology and Neuroscience.
A2	An understanding of the fundamentals of psychological research design & analysis.
A3	Detailed knowledge & understanding of findings & debates in biological psychology.
A4	Detailed knowledge & understanding of findings & debates in developmental psychology.
A5	Detailed knowledge of findings & debates in cognitive psychology.
A6	Detailed knowledge & understanding of findings & debates in social psychology.
A7	Detailed knowledge and understanding of findings and debates in individual differences in psychology.
A8	Detailed knowledge and understanding of Neuroscience and Neuropsychology
Cognitive skills	
B1	Apply multiple perspectives to areas within psychology and neuroscience
B2	Integrate perspectives in psychology
B3	Identify & evaluate patterns of behaviour & psychological functioning
B4	Formulate & explore research questions
B5	Perform quantitative & qualitative data analyses.
B6	Use statistical software to analyse data.
B7	Design, implement, analyse and communicate independent and group project work.
B8	Demonstrate effective written and oral communication enabling students to formulate and sustain a coherent argument;
B9	Use literature search software to gather and evaluate academic work;
B10	Use experimental software to design and run experiments.
B11	Use psychophysiological equipment to gather and interpret data.
