

MA Music and Sound for Screen

Portfolio Guidance

A collection of your creative work that introduces you and explains your abilities and skills. It should provide evidence of an interest in Music and/or Sound and ideally show a range of work from your undergraduate degree or industry experience.

We are looking for several examples, enough to see the range of your strengths and abilities. You are asked to submit a small portfolio of 3-4 pieces of up to 15 minutes total duration, which can be hosted via an online platform, such as SoundCloud, YouTube, Vimeo, Dropbox, or your own website. Please include the links in a single PDF document alongside some brief notes on each piece.

Detailed Portfolio guidance:

- Include examples of different kinds of techniques and processes you have tried – it is useful to show a range.
- If you can, include examples of creative thinking, research, and project development from your previous studies or industry work.
- Tutors use your portfolio to assess your potential to succeed in your area of interest, so they are looking for evidence of aptitude and endeavour.
- Your work should demonstrate your ability to study at Middlesex University and your specialist knowledge and skills in Music or Sound.
