Letter of commitment to the priorities of the Concordat for the Environmental Sustainability of Research and Innovation Practice

I, Shân Wearing on behalf of Middlesex University London, confirm our commitment to the priority areas outlined in the Concordat for the Environmental Sustainability of Research and Innovation Practice.

Middlesex University London fully supports the priority areas outlined in the concordat. We will deliver against all the priorities in practice and recognise our responsibilities as a signatory, as set out in the concordat.

By signing this concordat, we recognise the need to change how we conduct research and innovation as well as promote wider solutions. We also agree to take shared action now and into the future to reduce and eliminate our own environmental impacts and emissions and achieve the transition to sustainable practices.

Signing this concordat is important for Middlesex because it provides a framework for embedding environmental sustainability into research and innovation, ensuring that our practices align with the global need to address climate change. The concordat reinforces the University's commitment to leadership in sustainability. It directly advances the ambitions of our University Strategy 2031 by positioning Middlesex as a responsible institution contributing to a fairer and more sustainable society.

Yours sincerely,

Professor Shân Wearing
Vice Chancellor and CEO
Middlesex University London
